1. Adequate spacing
2. Well ventilated
3. Well illuminated
4. Personal effects lockers
5. Pedal operated bins
6. Garment collector (Laundry basket)
7. Hand washing facility and adjoining shower room
8. Seating facility for changing

f. DISINFECTION AND LAUNDRY

ITEM
Access to disinfecting facility
Laundry

g. EMBALMING ROOM (where applicable)

a. General Equipment

1. Stainless steel table(s)/slab adequate number
2. Full PPE per embalmer
3. Trolleys with body tray
4. Body bags
5. Embalming Instruments and equipment (e.g., artery tubes, mortician pump, cavity injectors Trocar, embalming needle, etc.)
6. Pedal operated waste bins

b. Environmental issues

1. Drainage system and waste disposal
2. Vermin control
3. Lighting (including U.V. light)
4. Unidirectional air flow (top to down) and extractors
5. Water supply system

h. STORAGE OF HUMAN REMAINS

	a. Equipment Maintenance
1	Availability of updated inventory
2	Availability of Planned Preventive Maintenance schedule; in house or outsourced or both (availability, dates of next servicing and types of equipment indicated)
3	Equipment Calibration schedule (Fridges, weighing scales, etc.): Availability of schedule, calibration done on schedule and calibration log sheet properly filled
4	Access to a biomedical engineer/ technician
5	Records of maintenance available and or displayed
6	Availability of appropriate storage space for facility supplies (shelves, good ventilation and illumination)
7	Fault reporting and response log properly filled
8	Evidence of Equipment replacement plan
	b. General Equipment
9	Full PPE per attendant
10	Trolleys with body tray
11	Body bags
12	Pedal operated waste bins
	c. Human remains storage
13	Required temperature (4°C to 8°C) – temperature chart
14	Availability of appropriate storage space for human remains
15a	Storage capacity of refrigerator/cold room. NOT TO EXCEED 10 BODIES
15b	Storage duration NOT TO EXCEED ONE (1) WEEK
16	Type and condition of refrigerator/cold room
	d. Environmental issues
17	Drainage system and waste disposal
18	Impervious walls and floors
19	Washable and disinfectable walls and floors
20	Stains and cracks on walls
21	Vermin control
22	Lighting (including U.V. light for overnight disinfection)
23	Unidirectional air flow (top to down) and extractors
24	Water supply system
25	Availability of Planned Preventive Maintenance schedule; in house or outsourced or both
26	Evidence of insurance

i. BODY VAN

	a. Driver(s)
1	Availability of licence (indicate class)
	b. Vehicle Maintenance
2	Evidence of regular maintenance
	c. Operational issues
3	Protocols for emergency replacement during human remains transport
4	Fault reporting and response log properly filled
	d. Clothing
5	Appropriate facility uniform
	e. General Tools
6	Vehicle tools (toolbox)
7	Appropriate fire extinguisher
8	First Aid box
10	Triangle
11	Spare tyre
	f. General condition of vehicle
12	Insurance of vehicle
13	Road worthy certificate

j. UNDERTAKING

a. Facility for washing	
1	Adequate water supply
2	Drainage system
3	Disinfectant
4	Slab for washing
b. Preparation of body for final disposal	
5	Facility for the service (in-house store/facility for producing required items, e.g. shroud, suit, coffin, etc) if available
6	Viewing rooms with slab(s), demarcated into clean & dirty areas
7	Chapel of Rest where applicable
