

Corrective Actions for Identified Weak Points

1. No exact warning signs (No Smoking, Danger, No Entry)

- Install standardized, clearly visible warning and safety signs at all required points.
- Use reflective or high-contrast materials.
- Review sign placement quarterly.

2. No directional signs

- Develop a directional map of the facility.
- Install arrows and labeled signboards.
- Use consistent colour and font formats.

3. Poor documentation – no training reports / minutes

- Create a documentation binder or digital folder.
- Record training dates, attendance, and topics.
- Keep meeting minutes chronologically.
- Assign a documentation officer.

4. No chain of custody documentation

- Develop a chain-of-custody form.
- Log movements, handling, dates, times, and signatures.
- Train staff on proper documentation.

5. No protocol for prevention of infectious disease

- Draft an infection prevention and control (IPC) manual.
- Train staff and conduct annual refresher sessions.

6. No pedal-operated bins with colour coding

- Procure appropriately colour-coded bins.
- Place bins at critical locations.
- Train staff on waste segregation.

7. No vision/mission displayed

- Draft or update vision/mission statements.

- Display at reception and staff areas.

8. No Quality Assurance Officer

- Appoint/designate a QA Officer.
- Develop QA checklists.
- Conduct monthly audits.

9. Staff documents kept in small files

- Create proper staff record files or digital profiles.
- Store securely and update regularly.

10. No UV light

- Procure UV sterilization equipment (if required).
- Train staff and maintain usage logs.

11. No viewing area

- Designate and prepare a proper family viewing area.
- Ensure privacy, cleanliness, and controlled entry.
