

AMPAH PRAH MORTUARIES

PROTOCOL FOR PREVENTION OF SPREAD OF INFECTION

In order to prevent the spread of infections at the work place, kindly observe the following:

1. **HAND HYGIENE:** wash your hands thoroughly under running water after every procedure, after removal of gloves, and after touching surfaces such as door knobs, slabs etc.
2. **RESPIRATORY HYGIENE (COUGH ETIQUETTE):** cough into a receptacle or hand towel as much as possible. In the event above are not possible, cough into the elbow but never in the face of others.
3. **PERSONAL PROTECTIVE EQUIPMENT (PPE):** Wear appropriate PPEs for every procedure and remove them safely after the procedure. Do not carry out a procedure without donning appropriate PPE. Also, use the right PPE for the right job.
4. **NEEDLE-STICK AND SHARPS INJURY PREVENTION:** As much as possible, prevent yourself and others from getting a needle stick injury or injury by a sharp object at the work place. In situations when a needle stick injury or injury by a sharp object occurs, follow the Post Exposure Prophylaxis (PEP) Protocols designed by the facility.
5. **CLEANING AND DISINFECTION:** Clean and disinfect all equipment, articles, floors and surfaces after the day work and periodically.
6. **WASTE DISPOSAL:** Dispose of all waste appropriately. Ensure proper waste segregation is done using the colour codes before final waste disposal.
7. **VACCINATION:** All workers must be vaccinated against Hepatitis B, Covid-19 and Tuberculosis.
