

HAND WASHING PROCEDURE

AMPAH PRAH MORTUARIES

Proper and effective washing procedure involves wetting your hands with clean, running water, applying soap, lathering for at least 20 seconds, rubbing and scrubbing the hands appropriately, rinsing thoroughly, and drying with a clean towel.

This process effectively removes germs and bacteria from your hands.

PROCEDURE FOR EFFECTIVE HAND WASHING

1. **Wet your hands:** Use clean, running water (warm or cold).
2. **Apply soap:** Use enough soap to cover all hand surfaces.
3. **Lather:** Rub your hands together, making sure to cover the backs of your hands, between your fingers, and under your nails.
4. **Scrub:** Continue rubbing and scrubbing your hands for at least 20 seconds. Singing "Happy Birthday" twice can help you keep track of the time.
5. **Rinse:** Rinse your hands well under clean, running water.
6. **Dry:** Dry your hands with a clean towel or air dryer.
7. **Turn off the faucet:** If using a public faucet, use a paper towel to turn it off to avoid re-contamination
