

INSPECTION TOOL FOR LICENSING A COLD STORAGE SERVICE

Assessment is by Observation, Interviewing, and Reviewing of Methods and Documents.

PRACTITIONER -IN-CHARGE: SERVICE MANAGER

GOVERNANCE, INFRASTRUCTURE, SAFETY AND SECURITY

a. STAFFING

Technical Staff
1. Embalmers (where applicable)
2. Cold storage porters/orderlies/cleaners/laundry attendants
3. Biomedical Engineer/ Access to a reputable Biomedical Engineering company
4. Others (specify) a. b. c.

b. STAFF ORGANIZATION

Staff clothing	1. Availability
	2. Appropriate to function
Staff identification tags	3. Name of facility
	4. Name of staff
	5. Staff ID No.
	6. Photo ID
	7. Designation
	8. Clear & Legible
	9. Date of expiry

c. DOCUMENTATION

1. EPA Certificate
2. Local Authority Permit
3. Standard Operating Procedure
4. Storage register
5. Certification of death (Medical Certificate of Cause of Death/Death Certificate)
6. Duty Roster (with leave schedule)
7. Minutes of staff meetings (at least 3 recent ones)
8. Incident/accidents records book
9. Fault reporting and response log properly filled
10.Chain of custody

d. MANAGEMENT INFORMATION SYSTEMS

Service Data	1. Reception/release registers as per guidelines
	2. System for ensuring confidentiality and data protection (refer policy on QA)
	3. Human remains data (registration and records)

e. OFFICE BUILDING

1. Service Manager's office	Adequate ventilation
	Adequate lighting
2. Staff changing room	
3. Communication systems	Availability of notice boards (for public and staff at vantage areas)
	Official phone lines
	Records of communication with staff
	Display of official phone numbers of management to staff

f. SIGNAGE

1	Directional signs (Should be clear, boldly written and available to and within the facility)
2	Warning signs (No smoking, Danger, No Entry, Staff Only, etc.)
3	Emergency evacuation diagram clearly displayed at vantage areas
4	Entrances and exits are clearly labelled
5	Hazard/safety signage on entrances clearly visible (<i>final waste disposal</i>)

g. EQUIPMENT AND ASSETS MAINTENANCE

Facility Equipment Maintenance schedule	1. Availability of updated inventory
	2. Availability of Planned Preventive Maintenance schedule; in house or outsourced or both (availability, dates of next servicing and types of equipment indicated)
	3. Records of maintenance available and or displayed
	4. Availability of appropriate storage space for facility supplies (shelves, good ventilation and illumination)

	5. Audible and visible alarm systems for fridge malfunctioning
	6. Fault reporting and response log properly filled
	7. Evidence of Equipment replacement plan
	8. Access to a Biomedical Engineer
Equipment Calibration schedule (Fridges)	9. Availability of schedule, calibration done on schedule and calibration log sheet properly filled
Storage facility	10. Required temperature (4°C to 8°C) – temperature chart
	11. Availability of appropriate storage space for human remains.
	12. Storage capacity of refrigerator/cold room
	13. Type and condition of refrigerator/cold room
Other	14. Full PPE per attendant
	15. Trolleys with body tray
	16. Body bags

h. WATER MANAGEMENT

Adequate water supply available	Easy to open taps
	Flowing water
	Adequate back up water supply

i. WASTE MANAGEMENT

1. Pedal-operated waste bins at the facility
2. Availability of appropriate colour-coded waste bin lining available in all areas Red (Biohazard); Black (General waste)
3. Protocol and procedures for prevention of spread of infectious diseases available.
4. Hand washing sinks with elbow/pedal/automatic tap and sanitizers available
5. Posters on appropriate hand-washing technique displayed
6. Procedure on decontamination and disinfection and storage of equipment (assess at least 1 staff - use Direct Staff Performance Assessment Tool)
7. Procedure for decontamination of soiled linens (assess at least 1 staff – use Direct Staff Performance Assessment Tool)
8. Cleaning schedule available (date, time, persons responsible and signed)
9. Access to incinerator (Appropriate location and stack height) /waste shredding/autoclave
10. *Treated Liquid Waste Disposal (Evidence of drainage to septic tanks, decontamination, no standing water for mosquito breeding, outsourced to liquid waste management company) White-rain/storm; Grey-Hand wash; Black water, etc., -Waste

j. STAFF WASHROOM

Bathroom	
1	Separate Male/Female areas
2	Flowing water
3	Towel bars
4	Clean floor, non-slip floors
5	System for waste disposal

Toilet facility	
1	Separate Male/Female washrooms
2	Working Water Closet (at least one in each of the separate washrooms)
3	Sink, elbow tap/ Infrared sensor with tissues/air dryer, hand soap
4	Toilet roll
5	Pedal bins with appropriate bin liners in each stall
6	Pedal bin/black liners in hand wash area
7	Clean floor, non-slip floors
8	System for waste disposal

k. CHANGING ROOM FOR STAFF

1. Adequate spacing
2. Well ventilated
3. Well illuminated
4. Personal effects lockers
5. Pedal operated bins
6. Garment collector (Laundry basket)
7. Hand washing facility and adjoining shower room
8. Seating facility for changing

l. SAFETY AND SECURITY

1. Accessibility of the facility (including washrooms) to the disabled
2. Ease of access to the facility
3. Limitation of movement within the facility (hazard zoning)
4. Loading/offloading bay for bodies, hearse bay, walk-ways)
5. Ease of navigation within the facility Availability of ramps for trolleys and equipment, wide passageways
6. Availability of functional lifts/escalators/elevators, or ramps (for facilities with storey building/ multiple level rack systems).
7. Parking area for staff & general public

8. 24-hour security (complete walled/barbed wire, gated, availability of security staff /surveillance systems)	
Fire safety systems	9.Functional and non-expired Fire Extinguishers (6kg dry powder, 3kg CO ₂) fire certificate displayed
	10.Fire/smoke detectors (select 2 areas)
	11.Availability of emergency assembly point, clearly labelled and evidence of training on fire fighting
	12. Availability of fire hydrant and or wet riser
Floors	13.Washable, No cracks on floors & non-slip
	14.Clean (dry, no litter/no stains and odorless)
Power Supply	15.No loose/exposed wires, No loose sockets/switches & available back up supply
	16.Adequate Backup power supply (accepted by an approved energy expert as determined by power rating)
Intact roof, ceiling, door And window	17. No gaps between wall and roof, No cracks & no cobwebs / No mold
Lighting	18. Well lit, all-around.
Laundry	19. On-site laundry for staff working clothing
	20. Vermin control

EMBALMING ROOM (where applicable)

a. General Equipment
1. Stainless steel table(s)/slab adequate number
2. Full PPE per embalmer
3. Trolleys with body tray
4. Body bags where available
5. Embalming Instruments and equipment (e.g., artery tubes, mortician pump, cavity injectors Trocar, embalming needle, etc.)
6. Pedal operated waste bins
a. Environmental issues
1. Drainage system and waste disposal
2. Vermin control
3. Lighting (including U.V. light)
4. Unidirectional air flow (top to down) and extractors
5. Water supply system

Adequate slab number = 1 tray : 2 bodies per day
