

FAULT REPORTING PROCEDURE : AMPAH PRAH MORTUARIES

1. Identification and Detection:

- Recognize a problem or malfunction, which could be through visual inspection, error messages, or user reports.

2. Report the Fault:

- Report the fault through the designated channels, such as phone calls to superiors, online platform via WhatsApp, or a physical logbook.
- Provide as much detail as possible about the fault, including the location, date, time, and a description of the problem.

•

3. Gather Information and Analysis:

- Gather evidence related to the fault, including error logs, screenshots, or any relevant data that can help in understanding the issue.
- Analyze the collected information to understand the nature and potential causes of the fault.

4. Escalation and Resolution:

- Depending on the severity and complexity of the fault, it may need to be escalated to a higher level of support or a specialized team.
- Assign the responsibility for resolving the fault to the appropriate individual or team and track the progress of the resolution.

5. Document and make Follow-up:

- Document the entire process, including the initial report, analysis, actions taken, and the final resolution.
- Follow up to ensure that the corrective actions were effective and that the fault is completely resolved
